SDMIMD receives international accreditation

Shri Dharmasthala Manjunatheshwara Institute for Management Development at Schools and Programs (ACBSP), has received international accreditation for their flagship management programme – Post Graduate Diploma in Management (PGDM).

With the accreditation, SDMIMD has become a part of Global Education Network with ACBSP accredited campuses across the globe. The accreditation would provide SDMIMD with access to exchange programs, research programs and cultural enrichment with other member institutions. With ACBSP's student – centric teaching and learning approach, the students would get global recognition. The faculty members of SDMIMD would also become the part of global network of ACBSP accredited faculty.

Many experts in the field of management education feel that the performance of SDMIMD in its corporate interaction and placements, world class infrastructure, academic rigor and adherence to ethical values derived from the Dharmasthala Philosophy, paved the way for the international accreditation.

The ACBSP accreditation will help SDMIMD to nurture young managers of our PGDM Program who are employable in global marketplace, equip students to solve multi-disciplinary problems with their leadership and decision making abilities and will provide opportunities for the faculty to be invited to foreign universities for handling courses and sessions.
